

JISO ILUMINACIÓN

LAUNCH. FRANKFURT FAIR

I JISO Iluminación

This year has been a year of improvement and success for us. We have launched a new catalogue, a new website and new products that reflect our commitment to innovation, design and energy efficiency. Our aim is to offer lighting solutions adapted to the needs of the most demanding projects. In this new document, we present the new products that we will be adding to our extensive catalogue of indoor, outdoor and industrial products in 2024. You can also consult all the technical information of all our luminaires on our website. We look forward to continuing to illuminate your life with our light.

I Interchangeable optics to suit different applications without tool

Louver 78° Louver 78° Microprismatic 92° Opal 105°

I CCT (2700K-3350K-4000K)

You can adjust the tone of the light according to the user's preferences or needs from warm to cool light creating different atmospheres and sensations.

I Quick Connection

A new way to connect two lengths, in only 5 seconds and without tools you can join two luminaires without light leakage.

I Sensor

Control the switching on/off of your luminaire based on the detection of movement. These types of sensors are used to save energy, improve security and create intelligent environments.

I Wall

Thanks to its installation accessory you can attach the luminaire to the wall creating interesting light and shadow effects.

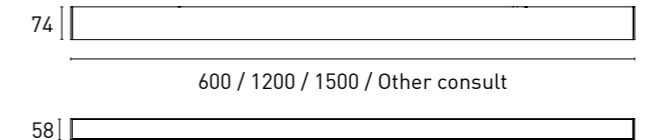

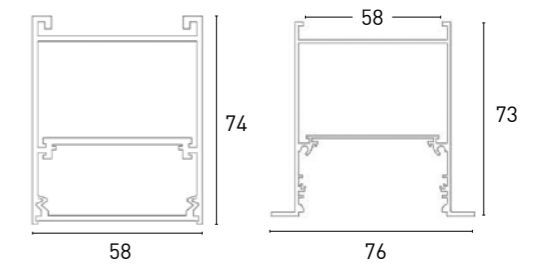

I Up lighting

Modular up lighting that can be easily added to the profile at the time of installation.

CRAWs

Linear Systems. Indoor

Linear is one of the most important families in our catalogue. The Craws model with cover provides general illumination, while the Louver F variant provides excellent task lighting. The size of the luminaire ensures a minimalist and unobtrusive appearance. Its versatility is demonstrated by its use in homes, offices and shops. In addition to the standard version there are also different system solutions that can be adapted to specific projects. It is available in black and white finishing.

MILKY L&P

Magnetic. Indoor

Milky L and Milky P are an innovative solution for creating unique and personalised atmospheres. Their magnetic system allows the corner luminaires, which belong to the Caterpillar collection, to be easily attached and can be combined with other luminaires, both in their vertical and horizontal versions. In this way, creative and original lighting compositions can be created, adapted to each space and need. The corner luminaires emit a linear and uniform light, which is projected onto walls and ceilings, creating effects of volume and depth. Milky P and Milky L are ideal for interior design, architecture and design projects.

ACCESSORIES

NEW

| STRIP & HEAT SINK

| LED COB

Our collection of COB LED strips has been extended with two new power options: 4W and 8W. These models are available in IP20 and IP65 with dust and water protection. Thus, all our COB LED strips now offer this advantage, as all our models are also available in IP65. They are ideal for illuminating indoor and outdoor spaces with uniform, high-quality light.

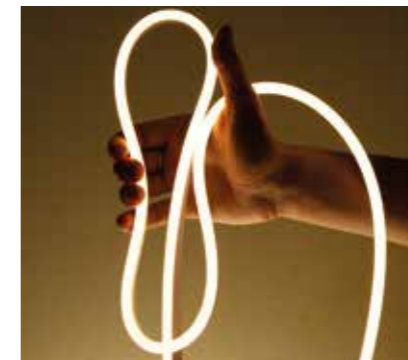

| All options IP65

We are expanding our range of IP65 LED strips. You can find all our IP20 LED strips in IP65, ideal for lighting any space, from indoors to outdoors, with quality and efficiency. We have different options of colours, intensities and effects to adapt to the requirements of each project.

| 230V Strip

The new mains-direct LED strip is the ideal solution for projects that require simple installation over long distances. As no transformer is required, compatibility and overheating problems are avoided. In addition, it provides uniform and high quality illumination.

| Neon LED. Noun

Introducing Noun, the new neon collection. Four new models with innovative designs, with which to create unique and personalised atmospheres. The flexible strips adapt to any surface and can be placed vertically or horizontally. In addition, the new cylindrical neon models offer a 360° surround illumination without interruptions. Discover Noun's possibilities for creative lighting.

| Flexible for Signage

For creative illumination of signs we present our new flexible LED strip that adapts to any surface. This LED strip has the advantage of being able to create original and personalised designs on ceilings and walls, giving a touch of distinction to any space. The flexible LED strip is easy to install and has a long durability and low energy consumption.

| News Heat dissipator

We have expanded our new line of heat sinks, which complement the family. These heat sinks have the function of embellishing and personalising different environments with a touch of creativity. They also help to preserve the performance of our LED strips. We have a variety of models that can be installed on walls, ceilings, pendants or skirting boards, according to the preferences of each customer.

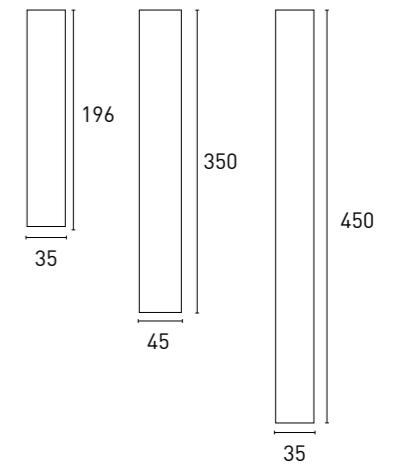

| TUBULE

Indoor

ARCEUS

Tubule. Indoor

The Arceus model is inspired by the shape of a tube, with three size and colour variants. Its panelled structure gives it an elegant and sophisticated look. With this model you can create original combinations that enhance the character of any environment.

| AKLY S

Tubule. Indoor

Akly S is a luminaire with an elegant and simple design that adapts to any type of residential or commercial environment. Its adjustable head allows the light to be focused on the desired point, highlighting the products on display with clarity and sharpness. Akly S offers two power levels to suit the needs of any space, from small shop windows to large showrooms. Its high light output and low energy consumption make it an optimal solution for stylish and efficient lighting.

TURTLE P

Tubule. Indoor

The accessories of the Tubule collection are ideal complements for Turtle lamps, which adapt to different styles and atmospheres. With these accessories, you can transform your Turtle lamp into a unique and original piece that reflects your personality and taste. The available accessories are Tube, Bowl, Plate and Cone, which are easily attached to the Turtle lamps and give them a different look. Tube allows you to focus the light of our Turtle lamp, creating a more intense and cosy effect; It can also be combined with Plate to personalise the design of the luminaire and adapt it to different environments. Bowl is a round bowl that creates a soft and cosy illumination. Plate is a flat plate that projects a direct and functional light. Cone is a cone that generates a focused and elegant light. With these accessories, you can personalise your Turtle lamps and create different spaces full of design and modernity.

STEP WALL

Indoor

WODDIS

Step Wall. Indoor

Discover Woddis, the new step wall collection for indoors. It is a luminaire that projects a direct and clear light. Its design is based on straight and elegant lines, and it is available in 3 models with different sizes, finishes and shapes. Its discreet relief on the wall gives it a touch of distinction and style.

I GOOMY

Step Wall. Indoor

Goomy is a wall-mounted luminaire for wall mounting to illuminate passageways or surfaces. It is small in size and does not take up much space. Its function is to bathe the wall in light, creating a decorative yet practical effect. The wall luminaire directs the light beam downwards, allowing the path or surface to be illuminated without glare or shadows. This type of luminaire is ideal for creating cosy and safe environments in corridors, stairways, entrances or terraces.

I IMPROVEMENT

I HAWK S

This 2024, the Hawk S, our most innovative model, features a new design. With a total black colour scheme, this luminaire combines elegance and modernity to illuminate any space in style.

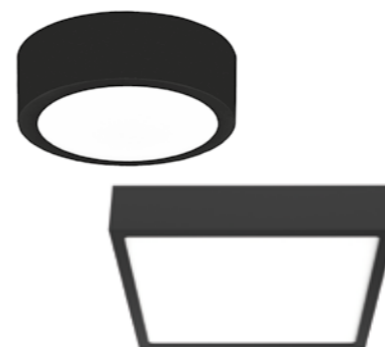

I PLATE&HONEY

This year we present the Plate and Honey accessories for our Hawk model, with a sophisticated black colour. The combination of these accessories with our luminaire creates a totally different model that brings elegance and class to the luminaire as well as to the space where it is installed.

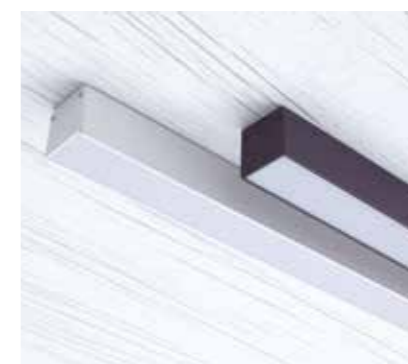

I 551 Black

One of our star models is our recessed Capsule 551 collection. Its gypsum effect makes the luminaire blend in with the ceiling when it is switched on, thus blurring its boundaries. To extend its offer, we are launching the black finish, so that it can also blend in with the most daring ceilings.

I Surface Narrow

Our Narrow surface-mounted luminaires are a classic in our PRO catalogue, both in their round and square versions. This year we are launching the black finish in its two models to adapt to market trends and to be present in any lighting project that requires it.

I Heat dissipator

Linear lighting is a versatile and elegant solution for any lighting project, which is why heat sinks are a key element. Heat sinks help to maintain the optimum temperature of the luminaires and prolong their lifespan. Market trends set spaces with black and white finishes, which is why we are extending the range of finishes of our heat sink models in these two colours. In this way, we can offer our customers the luminaire with the finish that best suits their needs.

I Waterproof screen

In the PRO catalogue of our brand, we have a variety of Industrial luminaires that adapt to different needs and environments. Recently, we have incorporated 4 new models of waterproof screens without technology, which offer the possibility of placing one or two tubes according to the customer's preference. These screens are available in two sizes and are ideal for wet or dusty areas.
